Desktop Style

The inspired design put into the Gateway® DX Series Desktop blends contemporary expression with everyday practicality. Stand back and notice how the soft curves and glossy black finish of the DX convey class and elegance in any environment. A glowing white light runs along the perimeter of the chassis and device deck, creating a soothing layered concept, perfectly aligned with your ambitious nature. Even in the dark, the unit's front-panel illuminated Gateway brand logo lets you know it's ready to tackle the day's tasks.

Front Panel Access

Look beyond the DX's sleek appearance and you see more sensible features that cater to your immediate needs. Discreetly integrated at a 45-degree angle on the unit's front side are your most commonly used connection points—USB ports, a digital media card reader, and headphone and microphone jacks. Without reaching around your machine, you can easily plug in your MP3 player, digital camera and other devices to transfer data and multimedia files.

Device and Cable Tray

Recessed into the top of the DX is a digital device tray. You no longer have to search around your desk for gadgets and peripherals because they'll always be right there, secure in a handy built-in compartment. The top rear deck of the system is designed to organize device cables for tangle-free management.

Easy-Swap Bay

Select DX models come with an Easy-Swap hard disk drive (HDD) bay, so you can add up to three serial ATA hard drives for a whopping 6TB of storage capacity. That's enough to hold your entire video, music and photo collections. Indeed, the DX meets the ever-evolving requirements of multimedia storage.
