Processing Power

The power inside the Gateway® DX Series Desktop is testimony to what you can accomplish when you have the right tools. First, rely on the 64-bit architecture of Genuine Windows® 7 Home Premium to get you around. Then, to ensure smart and seamless performance, 2nd-generation Intel® Core™ processors with Intel® Turbo Boost 2.0 Technology make your DX sizzle with speed and energy savings. Plus, high-end graphics and multithreaded gaming applications benefit greatly from Intel® Hyper-Threading Technology, enabling more efficient multitasking and faster response times.

Supercharged Graphics

Select models of the DX feature new-generation NVIDIA® GPUs and HDMI™ 1.4 ports. Add Microsoft DirectX® 11, a Windows® 7 graphics component that supports cutting-edge shading and texturing techniques, and your images become so incredibly detailed and lifelike you'll feel like you've been transported to a parallel universe. With compatible hardware and software (sold separately), you can even experience the immersive world of 3D in your games and movies.

Blu-ray™ Way

Enjoy the rich and crisp embodiment of high-definition video and audio on select DX models via Blu-ray technology. Specifically engineered for HD, Blu-ray offers 6x the video resolution of DVDs, plus improved surround sound audio. And don't disregard your DVD collection just yet because Blu-ray Disc players seamlessly play back and upscale DVDs, too.

Faster Transfers

Optional USB 3.0 ports on your DX deliver 10x the data transfer rate of USB 2.0. That means wait time is greatly reduced during data transfers between your PC and a digital device. USB 3.0 also optimizes power efficiency—using one-third the power of USB 2.0, yet providing twice as much power for charging devices like MP3 players and Smartphones.

Optimized for Microsoft® Office 2010

[Purchase Office 2010](#) to use the full-featured Office suite on most new Gateway PCs—activation is easy and takes only a few minutes. (Also includes limited-functionality versions of Microsoft® Word and Excel with advertising; Outlook and PowerPoint are not included.)
