The Extron® System 5 IP

Classroom A/V Switching, Control, and Monitoring, All in One Box

The Extron System 5 IP simplifies your classroom's integrated A/V system needs by combining a full-featured switcher with the power of IP based asset management. Featuring integrated IP Link technology, the System 5 IP makes it easy to monitor, schedule and troubleshoot A/V system operations for an entire campus of rooms from one central location.

By bringing all of the key A/V system integration elements together, the System 5 IP offers a cost-effective, one-box solution for a variety of instructional technology environments. And best of all, it eases the process of system design, installation, operation and support, while offering powerful tools for A/V asset management.
